LAMPARA

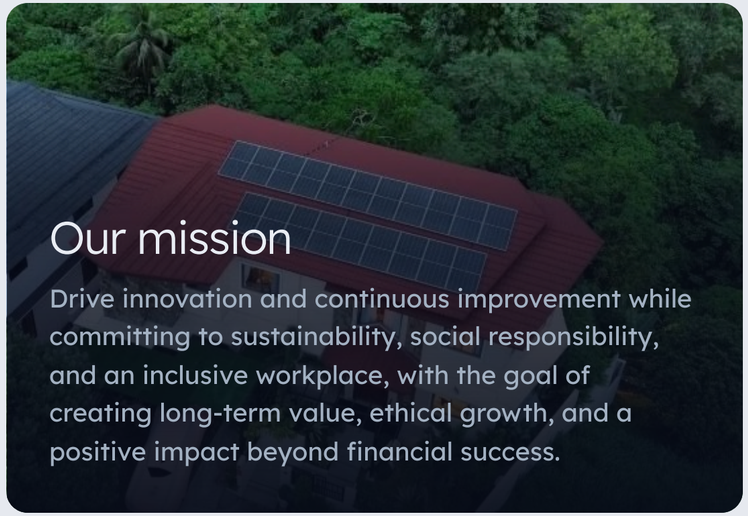

Power Outage Worries, No More.

LAMPARA Electrical Installation Services: licensed solar and electrical installation for homes, businesses and utility-scale sites across the Philippines, since 2019.

Company profile, 2026

Redefining electrical standards

In 2019, LAMPARA embarked on a journey within the electrical industry, with a focus on advancing both conventional and renewable energy systems and redefining standards in electrical design, manufacturing, installation and service for residential and commercial projects alike. From site explorations and resource assessments to procurement and operational oversight, every project has been an opportunity to refine our process and sharpen our capabilities. At the heart of it all is client satisfaction: each engineering solution tailored to the client it is built for, and every partnership built on trust.

Our mission

Drive innovation and continuous improvement while committing to sustainability, social responsibility, and an inclusive workplace, with the goal of creating long-term value, ethical growth, and a positive impact beyond financial success.

Our vision

Become a leading global electrical contracting company by delivering affordable, reliable, and high-quality services, driven by innovation, skilled professionals, and strong client relationships.

Solar farm

Utility-scale ground mount, from racking to inverters.

Services that fit the job

Electrical design & planning

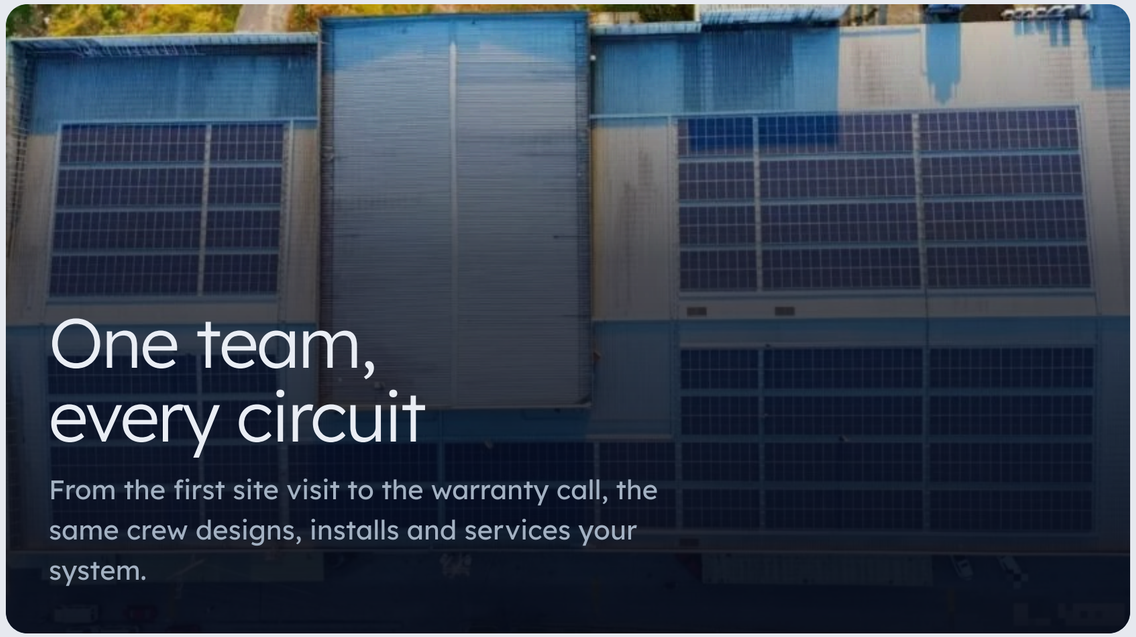

Comprehensive design and planning tailored to each client and project.

Maintenance & repair

Proactive upkeep that maximizes equipment lifespan and minimizes downtime.

Safety inspections

Rigorous compliance testing against industry standards and regulations.

One team, every circuit

From the first site visit to the warranty call, the same crew designs, installs and services your system.

Consultation & project management

Guidance through every step, from initial planning to final execution.

Emergency response

Responsive troubleshooting that minimizes disruption when issues come up.

Installation & commissioning

Professional installation executed with precision and attention to detail.

Energy audits

Efficiency assessments that identify where clients can cut energy costs.

Not sure what you need?

Book a site assessment

From site visit to switched on

One team from start to finish, with warranty service for as long as the system runs.

Site assessment

A free on-site survey of the roof, load and electrical setup, the same form our surveyors have used for every job since day one.

Engineering & design

A system sized to the site and the bill, specified down to the inverter and racking.

Permits & procurement

Utility and LGU paperwork handled, materials sourced from reputable manufacturers.

Installation & commissioning

Crew-led install, tested and energized, with a formal handover.

Monitoring & after-sales

Warranty service and performance checks for as long as the system runs.

Licensed and trained

Registered with the national and local government, and trained by the manufacturer on the inverters we install.
